The cast iron (C.I.) Powerglide ® transmission shares one distinction with the motor cars and motorcycles manufactured in the U.K: they all leak. Any transmission shop owner who is being honest with himself will admit this. Most are not surprised to see the owner of an early-model Chevrolet returning to their shop

with a piece of cardboard adorned with a large red spot.

## **Sonnax Cast Iron Powerglide® Leaks**

Cast iron Powerglides stopped in 62 with the 235 six and 283 V-8 still using the cast iron units. The 327 V-8 and the Nova/Chevy II 4 and 6 cylinders all got the aluminum Powerglides in 62 and all cars/trucks 63 on. Forget about ever using a cast iron Powerglide, unless it's for a restoration. The aluminum Powerglide is lighter AND stronger.
