Geometric patterns make up one of the three nonfigural types of decoration in Islamic art, which also include calligraphy and vegetal patterns. Whether isolated or used in combination with nonfigural ornamentation or figural representation, geometric patterns are popularly associated with Islamic art, largely due to their aniconic quality. These abstract designs not only adorn the surfaces of monumental Islamic architecture but also function as the major decorative element on a vast array of ...

Introduction to Geometric Design in Islamic Art The principles and teachings of Islam as a way of life, a religious code, and a legal system were promulgated by Muhammad (ca. 570-632 A.D.), an Arab merchant from Mecca. These teachings were revealed to him over a period of many years beginning in 610 and were subsequently codified in the

Read Book Islamic Geometric Design

The designs currently created in the Islamic world for the decoration of riads, palaces or mosques are copies of works created in past ages, which have been replicated again and again based on a limited back-catalogue. Variations on the original works are minimal, even in terms of scale, colors and motif combinations, due to the inherent limitations of the human mind and the technical difficulty of producing new combinations within the geometric genre using traditional methods, particularly ...

In Islamic culture, geometric design is everywhere: you can find it in mosques, madrasas, palaces, and private homes. And despite the remarkable complexity of these designs, they can be created with just a compass to draw circles and a ruler to make lines within them. Eric Broug covers the basics of geometric Islamic design.

Read Book Islamic Geometric Design

Islamic geometric design is a well-known artistic medium dating back many centuries. In recent years many artists, myself included, have been inspired to create new works which build off of the patterns and motifs found in these historical works. Historical research has shed light on how such patterns were originally

Through some library serendipity, I discovered Islamic Geometric Patterns by Eric Broug. It's a book of step by step drawing instructions. All you need is a ruler, compass, pencil and pen. While the geometry behind these patterns is enormously sophisticated, actually drawing out the shapes is surprisingly easy and relaxing.

[Homepage | School of Islamic Geometric Design](#)

The difference between the art of other cultures and Islamic art is the focus on pure abstract forms instead of natural objects. Muslim scientist lived in an era where geometry was the newest puzzle to solve. These scientists invented new theories and solutions. Geometric patterns were formed from geometric shapes that are often repeated.
